fusion[®]

Fusion Versa 'X' shaped display

Fusion is a stylish and robust modular display system from Plex Display. This versatile display equipment is designed to be extended and reconfigured quickly and easily.

Fusion can be used in many different ways and is ideally suited to a semi-permanent display environment. Fusion panels can be straight or curved, depending on the option selected, and X-shaped configurations are easily achievable.

Fusion has been further enhanced with the introduction of the Twist'n'Lock mechanism on the satin anodised aluminium posts. This new feature allows the posts to assemble and disassemble into 1m sections quickly and simply. This also means the Fusion system is easy to transport, particularly when using the wheeled Fusion case.

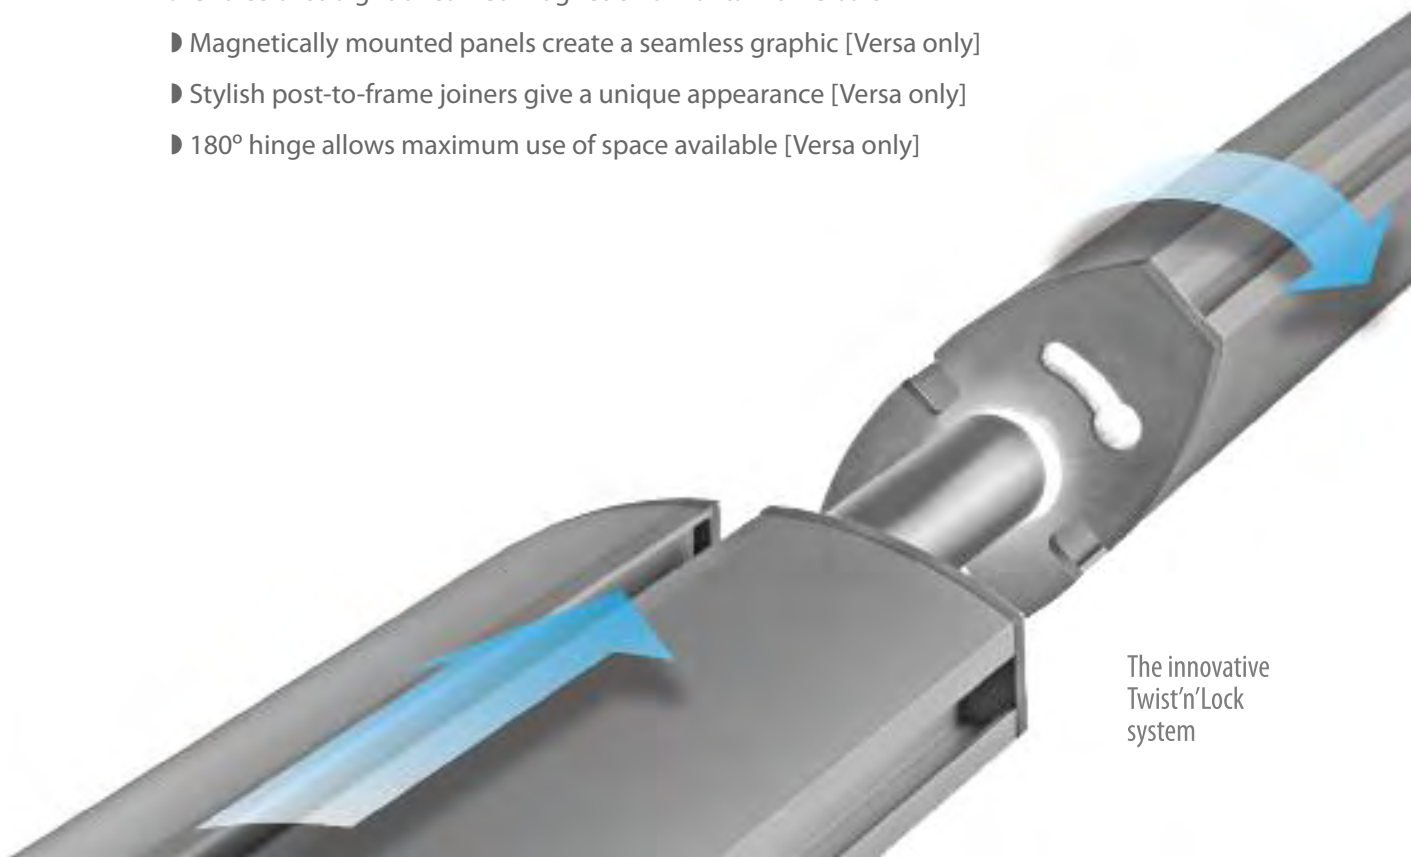

fusion®

fusion[®]

Fusion has two standard variations; **Rapid** and **Versa**. **Fusion Rapid** can accommodate rigid panels directly into the post and frame. **Fusion Versa** can be used with graphic panels magnetically mounted onto the frame or rigid panels slotted into the frame.

- ▶ Robust aluminium modular graphic display system
- ▶ Sleek satin anodised aluminium profiles used on posts
- ▶ Twist'n'Lock posts can be assembled in seconds
- ▶ System can be used single or double sided
- ▶ Available in both curved and straight configurations
- ▶ Available in 'Rapid' or 'Versa' kit configurations
- ▶ Rapid & Versa can be combined in the same display
- ▶ Choice of straight or curved magnetic horizontal frame bars
- ▶ Magnetically mounted panels create a seamless graphic [Versa only]
- ▶ Stylish post-to-frame joiners give a unique appearance [Versa only]
- ▶ 180° hinge allows maximum use of space available [Versa only]

The innovative
Twist'n'Lock
system

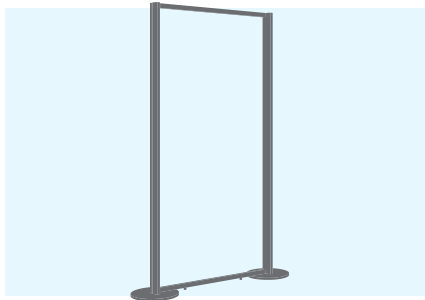

fusionrapid

Fusion Rapid is designed for use with rigid panels so is only available in straight configurations. Rigid panels (up to 8mm thickness) slot into the post and the frame. The Rapid system also features the Twist'n'Lock mechanism that makes assembly even simpler and quicker. Fusion Rapid can be easily reconfigured and extended and is suitable for combining with Fusion Versa systems. Fusion Rapid offers a blend of simplicity and style.

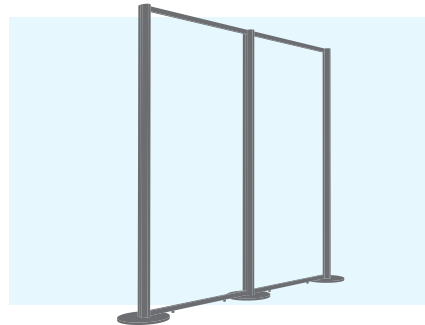

- ▶ Stylish and economical display solution
- ▶ Quick and simple to set up
- ▶ Rigid panels slot directly into post and frame
- ▶ Available in straight option only
- ▶ Rapid and Versa can be combined
- ▶ Easily extended and reconfigured
- ▶ Can be used single or double sided
- ▶ 4 standard kits available

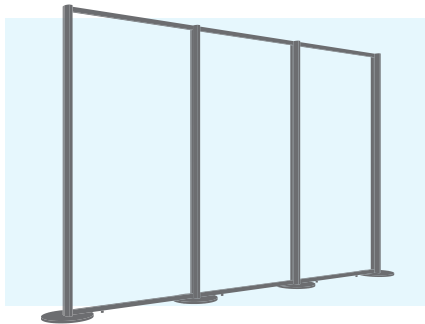

standard kit configurations

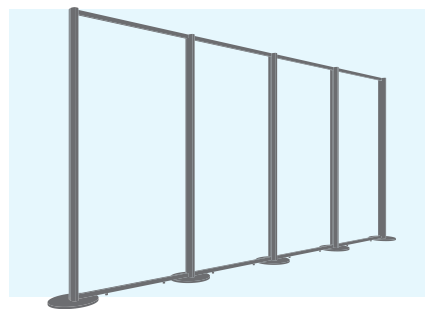

Rapid 1 Frame Kit
Suitable for rigid panels only.
Visual Area:
1928 x 938mm
each side.
Kit Code: 30295

Rapid 2 Frame Kit
Suitable for rigid panels only.
Visual area:
1928 x 1876mm
on each side.
Kit Code: 30296

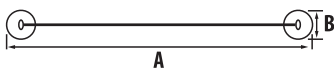

Rapid 3 Frame Kit
Suitable for rigid panels only.
Visual Area:
1928 x 2814mm
each side.
Kit Code: 30297

Rapid 4 Frame Kit
Suitable for rigid panels only.
Visual Area:
1928 x 3752mm
each side.
Kit Code: 30298

4 PANEL	4280mm	950mm	2036mm

fusionaccessories

table [1]

The Fusion Table is supplied in kit format and includes; 2 x 300mm post to frame joiners, 1 x 1m post section, 1 x base and 1 x Silver Grey laminated oval table top. All fixings are supplied and it is suitable for Versa and Rapid systems.

literature dispenser [2]

The Fusion literature unit is an attractive and stylish solution. Constructed from mild steel and supplied with all the fixings, it attaches directly to the assembled post. It can be used in landscape or portrait format and is suitable for Versa and Rapid systems.

transit case

Suitable for the Fusion modular display system, the wheeled case holds a maximum of a 2 panel straight or curved Fusion kit. Protective carry bags are included to stop any scuffing or rubbing of the aluminium sections. The case is designed to hold the frame, posts and graphics comfortably.

LCD bracket

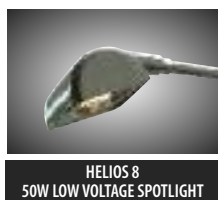

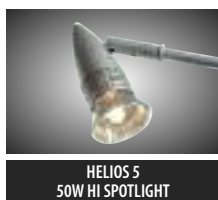

The LCD bracket is designed to pivot and tilt and is attached to the assembled post. The bracket is VESA mounting compliant and can accommodate a maximum weight of 15kg. It is suitable for Versa and Rapid systems.

180° hinge

The Fusion 180° hinge gives the option to set your own angles between frames and gives ultimate flexibility when setting up your display. It is only suitable for use on Versa systems.
